1 Background

The HiPAS GridLAB-D Template repository `autotest` system runs all the published templates are all the models Version 4 models published on GitHub. This report documents the validation data used when comparing the results of a proposed code change to the repository. Errors arising from this validation process will be reported as a DIFF error and cause a failure of the validation process.

2 Loadfactor Template

The `loadfactor` template allows loads in a model to be rescaled by an arbitrary factor. The validation test for this template rescales all the models by 50%.

Table 1: Validation data for loadfactor IEEE 123 loads

class	name	property	nominal.real	nominal.reactive	actual.real	actual.reactive
load	load_1	constant_power_A	40000.0	20000.0	20000.0	10000.0
load	load_1	constant_power_A_real	40000.0	0.0	20000.0	0.0
load	load_1	constant_power_A_reac	20000.0	0.0	10000.0	0.0
load	load_2	constant_power_B	20000.0	10000.0	10000.0	5000.0
load	load_2	constant_power_B_real	20000.0	0.0	10000.0	0.0
load	load_2	constant_power_B_reac	10000.0	0.0	5000.0	0.0
